

AA603R AURORA BRASS BOWL & 1/2, RIGHT HAND

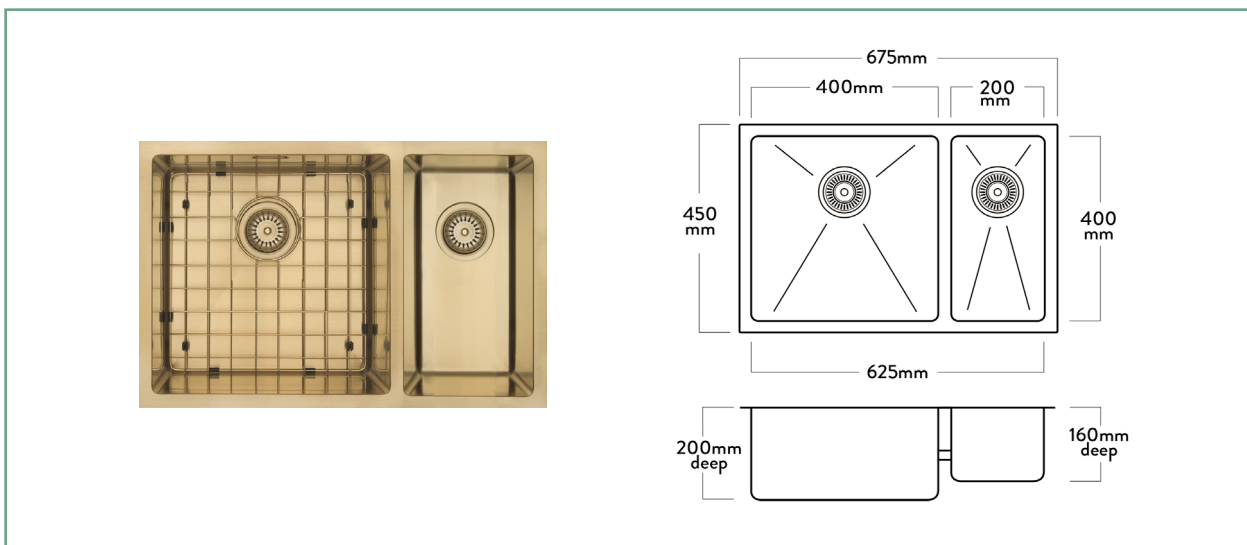

Make your sink a statement piece with a Mercer Aurora Sink.

A modern square design with all the benefits of stainless steel. The Aurora Series has a 10mm corner radius and is available in four colours copper, brass, gunmetal and stainless steel.

The Aurora series is coloured using a process called PVD (Physical Vapour Deposition). This process is one of the most environmentally friendly colouring technologies available as there is no liquid involved, making it far superior to other conventional coating methods such as electroplating or powder-coating.

Whether you want modern chic, an industrial feel or are after a simple traditional look, the Aurora Series is a stylish addition to any project.

Every Aurora sink comes with matching grid to place inside the sink.
